

Lap Band Reduced Weight

Lap Band Reduced Weight

After following through with Lap Band surgery, Lisa had already noticed about a 30-pound weight reduction.

Like many people before and after her, Lisa struggled with her dieting, having gone to fat camps and to every single diet program one can possibly think of.

Noting that diabetes runs in her family, Lisa, 32, said she didn't want to end up in a wheelchair.

Lisa was frustrated because although she had a lot of life left in her, being overweight was taking away her strength and drive to do things.
